

Solid, simple and smart:  
advanced reliability in compressed air

**DRB 20-34, DRA 10-20 IVR/DRB 20-34 IVR,**

**DRA 10-15 IVR PM/DRB 20-30 IVR PM**

How do you make a best-in-class compressor range even better? By adding unmatched efficiency. Ceccato's smallest screw compressors, the DRB 20-34 fixed-speed and the DRA 10-20 IVR/DRB 20-34 IVR variable speed already gave you a lifetime of premium performance. The new DRA 10-15 IVR PM/DRB 20-30 IVR PM and its iPM technology now offer you double-digit energy savings and a smaller environmental footprint. Compact and quiet, all three models can be used in your compressor room or at the point of use, as a primary or as a complementary compressor. So no matter how tough your requirements, our most versatile rotary screw compressor is sure to meet them.

### Performance

- Up to 45% energy savings with DRA 10-15 IVR PM/ DRB 20-30 IVR PM motor (compared to fixed-speed).
- Up to 17% improved energy efficiency with new iPM technology (compared to VSD).
- Reliable operation, even in ambient temperatures up to 46°C.
- The IP54-enclosed drive train safeguards performance in dusty and humid conditions.
- Direct drive VSD and iPM drive ensure reliable performance.
- Sound levels as low as 62 dB(A).
- Advanced Airlogic<sup>2</sup>T touchscreen controller maximizes performance and efficiency.

### Flexibility

- From 7-26 kW with a pressure range between 4 and 13 bar.
- Available with iPM, Variable Speed Drive and fixed-speed drive train technology.
- Floor-mounted or tank-mounted models, with or without integrated dryer.
- Multiple tank sizes available.
- Can be installed in your compressor room or at the point of use.
- Flexible customization with wide range of options.

## A versatile range

### DRB 20-34 fixed-speed

- Superior technology compared to belt drive thanks to in-house air end design and gearbox technology.
- Built for long duty cycles and continuous operation.
- IP55, class F IE3 motor, ideal for operation in tough conditions.
- Robust and silent design.
- Payback within 2 years for upgrade from belt drive to gear drive.

+ TCO\* SAVINGS  
PERFORMANCE

### DRA 10-20 IVR/ DRB 20-34 IVR variable speed

- Direct-driven transmission.
- Designed for variable load conditions, saving up to 35% compared to fixed-speed.
- Improved Specific Energy Requirement.
- Payback within 2 years for upgrade from fixed-speed to VSD.

+ TCO\* SAVINGS

PERFORMANCE

SERVICEABILITY

LIFETIME

### DRA 10-15 IVR PM/ DRB 20-30 IVR PM

- Up to 17% additional energy savings compared to traditional VSD technology.
- Ideal for highly efficient operation during fluctuating air demand.
- Energy savings of up to 45% compared to fixed-speed.
- IP54, class H IE4 motor, oil-cooled for top performance.
- New design of air end and motor connection facilitates drive train maintenance.
- Payback after approximately 1 year for upgrade from fixed-speed to iPM.

## Payback in 1-2 years

break-even point  
after 1 year

## iPM for major energy savings

Energy takes up more than 70% of the cost of owning and operating a compressor. Ceccato's iPM technology was developed to give you significant energy savings. While traditional compressors only have one speed (100% on), iPM compressors adjust their motor speed to follow the fluctuating air demand that most production environments have. As a result, the DRA 10-15 IVR PM/DRB 20-30 IVR PM delivers energy savings of up to 45%. That means you can earn back the extra cost of the DRA 10-15 IVR PM/DRB 20-30 IVR PM (compared to a fixed-speed unit) in just 1 year. How's that for an easy decision?

## The bigger benefit of a small iPM compressor

Does energy efficiency make less of a difference in small compressors? On the contrary! iPM technology delivers its biggest energy savings (compared to fixed-speed models) in smaller compressors. That is why you can achieve return on your iPM investment after just 1 year.

## State-of-the-art engineering

At the heart of our model line-up, you will find best-in-class compression technology, designed and built for a lifetime of top performance. Just take a look at the DRA 10-15 IVR PM/DRB 20-30 IVR PM's drive train. Rated IE4 efficiency and class H motor windings, its maintenance-free interior permanent magnet motor gives you optimal efficiency in the hottest conditions:

- High efficiency credit to its direct drive, IE4 permanent magnet motor and high turn-down ratio
- High reliability resulting from its oil cooling and class H motor windings
- Easy maintenance and low downtime thanks to the new drivetrain coupling system

## The compact all-in-one compressed air system...

Ceccato compressors are built to save space. And if you choose a tank-mounted model, you get an all-in-one compressed air system with the smallest footprint. For maximum air quality, a refrigerant dryer can be fully integrated.

## ... That can be installed at the point of use

Thanks to their quiet operation and integrated design, our small rotary screw units can be installed on your production floor. That means you don't need a separate compressor room and can save on floor space, piping, and installation costs. You can reduce your investment and operational costs as well, as you can operate the machine at a lower pressure setting and eliminate pressure drops throughout your piping network.

Save on investment costs

- ✓ Minimal pressure drops
- ✓ Higher FAD

Save on operational costs

## Advanced monitoring, control & connectivity

The state-of-the-art Airlogic<sup>2</sup>T touchscreen controller – included as standard – gives you on-screen and remote insight into the performance of your compressor:

- Large 4.3" full-color touchscreen display
- 30+ languages
- Warning indications and shutdown alarms
- Service status and schedule indication
- Visualisation of running conditions over LAN network
- Compressor data analysis over ICONS

## ICONS

## Increased uptime, powered by ICONS

With the Intelligent CONnectivity System (ICONS), you get data and insights from your machines delivered to your computer, tablet or smartphone.

- Increase the reliability of your machine by identifying problems before they become a threat to the continuity of your production.
- Analyze and optimize your energy consumption and CO<sub>2</sub> emissions.
- Receive high-quality energy reports ensuring the ISO50001 compliance of your site.

# Premium compression technology

**Oil-cooled IE4 efficiency and class h interior permanent magnet (ipm) motor:**  
Maintenance free; includes innovative oil-cooling technology for optimal performance in up to 46°C.

**IP54 electrical cubicle:**  
Can withstand up to 60°C with the highest standards in EMC performance.

**In-house designed compression element:**  
Gives you best-in-class Free Air Delivery and Specific Energy Requirement.

**Drive train:** IE4 oil-cooled motor for optimal cooling performance. All-new conical coupling design for fast maintenance on the drive train.

**Oversized coolers and oil vessel:**  
For improved performance.

## A range of options

- Energy recovery
- Water separation drain
- Canopy heater
- Electronic water drain
- Heavy duty air inlet filter
- 8000H Oil
- Silencing baffle
- Line filter G
- Food grade oil
- Opt.econtrol 6I

## Maximize your energy savings

Energy is by far the biggest cost of owning and operating a compressor. Luckily, there are many options to minimize the energy consumption of your air system. Technologies such as energy recovery can have a huge impact on your bottom line and your environmental footprint, with energy savings of up to 75%. A holistic view of your compressed air system is key. It starts with the selection of efficient technologies when buying your compressor. But it doesn't end there. Monitoring and analyzing your air system as you use it will often reveal optimization opportunities. Your Ceccato representative can help you find those savings.

# Ceccato's heritage

Ceccato Aria Compressa is a product company that specializes in the design, production and sales of screw compressors and air treatment products like dryers and filters, within the Atlas Copco Group.

Atlas Copco is a world-leading business in more than 180 countries, a truly global company, that serves customers with its innovative compressors, vacuum solutions and air treatment systems, construction and mining equipment, power tools and assembly systems, with more than 44,000 committed employees in the Group who contribute to the success of the company.

Since 1936 the Ceccato name has represented a very simple and reliable product range, designed for an extensive variety of applications.

The stationary electric driven compressors produced by Ceccato have been largely distributed worldwide without any restrictions of ambient conditions or locations. The range of compressors is integrated with a wide selection of dryers and accessories in general, to make the Ceccato range of products an interesting business opportunity for any distributor worldwide. The attitude of Ceccato is to design and produce compressors according to the real market needs, in order to become a real reliable partner for any company who wants to establish solid and long-term relationships.

### CARE

Care is what service is all about: professional service by knowledgeable people, using high-quality original parts.

### TRUST

Trust is earned by delivering on our promises of reliable, uninterrupted performance and long equipment lifetime.

### EFFICIENCY

Equipment efficiency is ensured by regular maintenance. Efficiency of the service organization is how Original Parts and Service make the difference.
